

reservationlessCONFERENCING

service overview

Conferencing that Works Like you do

24X7 access to conference calling has become a required business tool much like your Telephone, PC or Cell phone. Without it your ability to be effective is reduced. converseNETWORKS Reservationless conferencing service gives round the clock access to an easy to use, reliable, secure and cost-effective conferencing service. Our Reservationless Conferencing is a completely automated service that enables you to quickly and easily communicate with up to 75 participants on a single conference at any time. Simply dial your toll-free number and enter your unique Participant and Moderator code to instantly begin a conference without a reservation or operator assistance.

Advanced Capabilities at your Fingertips

converseNETWORKS gives you the tools to easily manage your audio participants from your telephone key pad or from our easy to use Web Tools. You can, secure your meeting, record your conference or dial out to others on the fly. Or if you prefer, simply dial *0 and our Operators will do it for you.

Add Visuals

Be more productive by adding visual components to your conference. Your Reservationless account also gives you 24X7 access to our webCONNECT platform all with the same conference codes. Simply access the connectionCENTER on our web site to share, Presentations, Web Sites, Applications or your full Desktop all with no advanced reservation.

Support

converseNETWORKS operates on one of the most advanced conferencing platforms in the industry. Our state of the art technology provides conferencing at an economical price point with 24X7 live operator assistance to make sure your calls are flawless. You or your participants can dial *0 at any time during your conference for operator assistance.

Billing and Reporting

You can monitor usage on-line via myDASHBOARD for your entire organization. myDASHBOARD provides single page, at a glance access to conferencing services, features and account information. From the Dashboard, hosts can view and change their account profile information, subscribe to new account services, schedule audio, web and video conferences, and edit or cancel scheduled services.

converseNETWORKS also provides flexible and customized invoicing options. Our advanced billing system allows data to be summarized and sorted for internal accounting requirements or client charge back purposes.
